

AI USB Conference Camera

FEATURE SPOTLIGHT

- **Portable All-In-One design**

Sleek, easy to carry, and a snap to set up and use to expand the collaborative potential of the any where work place.

- **Perfect for Small Workgroups**

Optimized for teams of 1-6, experience UHD 4K video, 360° sound, which can control almost any application environment and greatly improve work efficiency.

- **Experience enterprise video**

NexPod Pro provides enterprise-level video functions with a USB solution. According to the participants in the conference room and their location, 4K cameras can automatically obtain the best image of the conference room, and automatically adjust the view when participants enter and exit the conference room to ensure that everyone is clearly visible and presents the best picture. The speaker tracking function can automatically locate the current speaker and present a close-up picture of him so that everyone knows who is speaking.

- **Multi-Device Connectivity**

Simply connect PC or Mac® to conduct life-like meetings with in your own familiar computing environment.

- **USB Plug-and-Play Connectivity**

With no special software, training, or maintenance required, connecting to a video conference has never been easier.

- **Bluetooth Wireless Connectivity**

Quickly and easily create a connection between any Bluetooth device and NexPod Pro.

NexPod Pro N149

NexPod Pro has a bright design — it makes video conferencing simple and easy, and everyone can easily initiate a meeting; at the same time, it is super cost-effective and allows every meeting room to use the video function. This video conferencing solution is specifically designed for small teams of less than six people. It has a wide 120° wide-angle, digital pan and mechanical tilt functions, 5x high-definition digital zoom, and clear and detailed optical effects, allowing all participants in the room to have a glance. NexPod Pro adopts an integrated design and is equipped with a built-in battery. NexPod Pro is small and exquisite, with a diameter of only 75 mm, which is very suitable for home offices and small rooms. With NexPod Pro, you can also use USB and Bluetooth mobile speakers for excellent audio calls. The true 360° omnidirectional sound effect allows users to make a smooth conversation within a diameter of 3 meters, while echo cancellation and noise reduction technologies provide immersive sound effects.

Zoom

- **Every speech in the meeting can be heard clearly**

Thanks to the abundance of sound quality and precisely positioned microphone pickup function, it brings a clear sound quality experience to all participants. At the same time, acoustic echo cancellation and noise reduction technology can make conversations appear to be in the same meeting room.

- **Remote Control**

Easily operate camera pan/tilt/zoom and audio functions (volume, mute) during meetings.

- **Works with Most Video Conference Applications**

Users are free to use the desktop video conferencing program of their choice.

- **Rechargeable Battery**

Flexibility to leave the power cord behind: run video calls/screen mirroring for up to 3 hours or use the speakerphone for up to 15 hours with a fully charged battery (chargeable via USB or AC power.)
